

To Whom it May Concern,

Hani Zaidi was a student in my 2025 Spring Semester Communications Technology Course at Oakville Trafalgar Secondary School in the Halton District School Board. At this time I had the opportunity to observe Hani's individual and group work during the year, and I was impressed by his creativity, innovation, ambition, and drive.

Hani completed Communications Technology with top marks in the class, and was always focused on how he could use his design skills and innovation to creatively find solutions to every challenge. Hani's work was exemplary for this course.

I believe Hani's technical abilities, as well as his interpersonal skills make him an asset to any program. He brings a tremendous amount of creativity, energy, focus and drive to everything he does. In particular, Hani did an outstanding job teaching Industry Standard Animation Software to grade 7 students, as part of a promotional visit for Oakville Trafalgar High School and the Communications Technology Course

Since I have known Hani, he has presented himself as a responsible, ambitious, creative, self driven, efficient, organized, and innovative individual. For these reasons, he has my highest recommendation.

Please feel free to contact me if you have any further questions regarding this student.
Regards,

Wade Stark
